PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience delivering enterprise application enhancements, troubleshooting production and database issues, applying secure-coding fixes, and coordinating releases. Delivered 40+ application features, resolved 100+ production issues, remediated 100+ security findings (including Critical and High severity), and coordinated 25+ production releases for a vehicle-management platform serving customers across the US and Canada. Hands-on project experience with C#, .NET 8, ASP.NET Core Web API, Entity Framework Core, and SQL Server.

TECHNICAL SKILLS

Programming: C#, Java, SQL, JavaScript, TypeScript
Backend & APIs: .NET Core, ASP.NET Core, ASP.NET MVC, ASP.NET Core Web API, REST APIs, routing, middleware, dependency injection, model binding, DTOs, request validation, Swagger/OpenAPI
Database & Data Access: SQL Server, T-SQL, Entity Framework Core, LINQ, relational database design, parameterized queries, query troubleshooting, JDBC
Core Software Engineering: OOP, interfaces, abstract classes, exception handling, collections, generics, debugging, root-cause analysis
Design & Testing: Layered architecture, service/repository separation, SOLID principles, design-pattern fundamentals, async/await concepts, unit testing with xUnit
Security — Familiar: OAuth 2.0, JWT (JSON Web Tokens)
Java Ecosystem — Familiar: Spring, Spring Boot, Hibernate/JPA concepts
Frontend: Angular, ReactJS, HTML, CSS, jQuery
Tools & Delivery: Azure, Git, GitHub, Visual Studio, SSMS, DBeaver, Jira, New Relic, ArmorCode, Contrast, GitHub Copilot, CMD, PowerShell, SDLC, Agile/Scrum, QA/UAT, production support, release coordination
AI-Assisted Development: Prompt engineering; GitHub Copilot for code assistance and improving development efficiency and output quality

PROFESSIONAL EXPERIENCE

SOLERA — Software Engineer II | Bengaluru, India | May 2023 – September 2026

MSOPro — Enterprise vehicle-management application serving customers across the US and Canada

- Delivered 40+ application features from product and client requirements, including functionality, fields, buttons, records, validations, workflows, and reports; supported implementation, pull-request reviews, QA/UAT, and post-deployment monitoring.
- Supported MSOPro, an enterprise vehicle-management application used across the US and Canada, translating product requirements into application changes while protecting existing functionality.
- Resolved 100+ production and customer-impacting issues, including high-priority tickets and NOC support, through application investigation, targeted SQL queries, root-cause analysis, and corrective fixes.
- Permanently resolved 20+ recurring P1 data issues, eliminating repeated manual intervention for the addressed issue categories and reducing recurring operational effort.
- Developed self-service functionality that enabled authorized users to perform specific operational actions, reducing dependency on development and support teams for recurring data-related activities.
- Remediated 100+ security findings, including Critical and High severity issues; addressed SQL injection vulnerabilities using parameterized queries and secure-coding practices, and investigated findings reported through ArmorCode and Contrast.
- Led and coordinated 25+ production releases, preparing DLLs and other deployment artifacts, version-update scripts, and release scripts; supported deployments across DEV, QA, and UAT.
- Supported release validation and post-deployment monitoring using New Relic, focusing on critical application functionality; collaborated with Product, DBA, NOC, QA, and SCM teams.
- Led daily stand-ups, reviewed pull requests, and mentored two junior developers.

PROJECT

AutoCare360 — Vehicle Service & Claims Management Platform

C# | .NET 8 | ASP.NET Core Web API | Entity Framework Core | SQL Server | Swagger/OpenAPI | xUnit

- Built a vehicle service and claims management backend using ASP.NET Core Web API (.NET 8), layered architecture, dependency injection, and service/repository separation.
- Implemented REST endpoints, DTOs, request validation, SQL Server persistence, and Entity Framework Core migrations; documented APIs with Swagger/OpenAPI and added xUnit tests.

ACHIEVEMENTS

Star of the Month (2×), merit letters, and appreciation from Product and management.

EDUCATION

B.E., Computer Science & Engineering — CMR Institute of Technology, Bengaluru | 2022 | CGPA: 7.25
Diploma, Computer Science & Engineering — Government Polytechnic, Belur | 2019 | 68.04%

CERTIFICATION

Certified Full Stack Developer — KodNest | 2023
